

LONG book: bricks → 1/0 → F1 spot → NEXT brick = fake result → F2 arms → money trade

GREEN=1, RED=0 → that is the **bit (raw)** string. **F1 spot** = raw string **ends in** the pattern; it bets the NEXT brick is green. The NEXT brick is the **Fake trade result** **W(1)/L(0)**; those bits form the **outcome string** (last column). **F2** = outcome ends in its pattern → ARMED. An armed spot = **FIRE** (enter after that brick's close). The **money trade** result lands on the **next** brick after the FIRE.

Example 1 — F1 = 10 F2 = 01 or 10

brick	1	2	3	4	5	6	7	8	9	10	11	12	13	14	full string
colour	G	R	G	R	R	G	R	G	R	R	G	R	R	G	
bit (raw)	1	0	1	0	0	1	0	1	0	0	1	0	0	1	10100 10100 1001
F1 spot		▼		▼			▼		▼			▼			
Fake trade result			W(1)		L(0)			W(1)		L(0)			L(0)		10100
action							FIRE		FIRE			FIRE			
money trade								1		0			0		100

raw string = **10100101001001** → outcome string = **10100** → money-trade string = **100**. FIRE at bricks 7, 9, 12 (enter after that close). Money result = next brick: b7→b8=**1**, b9→b10=**0**, b12→b13=**0**.

Example 2 — F1 = 100 F2 = 01 or 10

brick	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	full string
colour	G	R	R	G	R	R	R	G	R	R	G	R	R	R	G	R	R	
bit (raw)	1	0	0	1	0	0	0	1	0	0	1	0	0	0	1	0	0	1001 0001 0010 0010 0
F1 spot			▼			▼				▼			▼				▼	
Fake trade result				W(1)			L(0)				W(1)			L(0)				1010
action										FIRE			FIRE				FIRE	
money trade											1			0				10

raw string = **10010001001000100** → outcome string = **1010** → money-trade string = **10**. F1=100 (green,red,red) — rarer. FIRE at bricks 10, 13, 17; money result = brick after each fire (b10→b11=**1**, b13→b14=**0**).

Note. This is the **theoretical** set-up. The raw string, F1 spot, fake result, outcome string and F2 fire come purely from brick colours (price direction) — the raw string runs on its own and does not care whether you trade, win, lose, or hit a broker error. The **money trade** row is the theoretical trade result; the **REAL** fill also depends on the live data feed, margin rules, exchange/broker fill behaviour, regulations, and connection.
